DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1 – 3 and 6 – 8 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 – 22 of U.S. Patent No. 6,444,592. Although the conflicting claims are not identical, they are not patentably distinct from each other because the density of the nitrogen in the oxynitride layer of the aforementioned patent is not disclosed. However, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have the claimed density since density is a process variable and determining the optimum values requires routine experimentation, which is done by someone of ordinary skill in the art. Note that the specification contains no disclosure of either the critical nature of the claimed density or any unexpected results arising therefrom. Where patentability is said to be based upon particular chosen density or upon another variable

Art Unit: 2823

recited in a claim, the Applicant must show that the chosen density is critical. In re Woodruf, 919 F.2d 1575, 1578, 16 USPQ2d 1934, 1936 (Fed. Cir. 1990).

Response to Arguments

3. Applicant's arguments with respect to claims 1 – 3 and 6 – 8 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion
